## **Verse I:**

Keep it real or don't keep it at all  
It's not too hard to do  
Meet me openly, honestly  
Share your truth with me calmly  
I'll do the same for you  
Don't cut your nose to spite your face  
Don't burn your house down to smoke out a rat  
We're face to face  
But not in the same place  
But nobody can tell you that

## **Chorus:**

'Cause you won't say what the truth is  
But the truth is the truth hurts  
And the hurt stays  
I can't keep track of all the ways you like to oscillate  
Your lies are poison to the way I like to operate  
You'd think they paid you by the word the way you fabricate  
And aggravate

## **Verse II:**

I don't think I'm asking for too much  
Just your candor, respect, and your honesty  
And your loyalty, morality, veracity, sincerity, integrity, fidelity  
Okay maybe, but  
Come to me  
And I'll meet you my friend  
You knew that from the start  
But you chose a different route  
That was farther from the truth  
'Cause it was easier than saying it all

## **Chorus:**

'Cause you won't say what the truth is  
But the truth is that the truth hurts  
And the hurt stays  
I can't keep track of all the ways you like to oscillate  
Your lies are poison to the way I like to operate  
You'd think they paid you by the word the way you fabricate  
And aggravate

## **Outro:**

Your lies can't confuse the truth

Your lies won't save you from you  
(x4)
