

Resume Skydin Zeal

Skydin Zeal received a Master's and a minor with a concentration on painting, drawing and communications design, respectively. He has exhibited in Manhattan New York's Chelsea Fine arts district from 2000 to present.

Painter to Metalsmith: In 2008 Skydin began to teach himself the art of metalsmithing. This has become what he is most known for today. The subject matter of his current body of work is the result of his 8 years teaching at The Edgar Cayce Center of Manhattan, NY.

Metaphysics & Art: The courses that he taught involved spiritual techniques such as those utilized to consistently exit the body to consciously traverse the Astral plane. Like Edgar Cayce, Skydin was sought for spiritual consultation.

Current Works: "My current thesis involves 'Talismans' that are initially created as sculptures when through a completely ascetic lifestyle, I receive clear, divine instruction." The symbols riddling 360 degrees of each of his pieces are drawn from his research into ancient religions. Paradoxically the form of his pieces is channeled from future cities, machines and vehicles.

Skydin Zeal is a moving story teller who has been a guest speaker at spiritual pilgrimages to sacred sites since 2012. He was also Creative Director of a Newspaper for 10 years and enjoys promoting galleries that represent him across 17 social media accounts, website (founded: 1998) & Newsletter.
