Artist's Statement

I am equally thrilled at a breathtaking sunrise on a beach, a tranquil moment of a sunset, a deserted rusty barge, or a patch of oil film on asphalt. Photography gives me an ability to capture these images and to share them with others. These captive beauties also trigger my creativity. I have spent as many hours taking pictures as manipulating them in computer, my digital darkroom. My education in Computer Field provides me a quick and easy switch to the current technology and enables me to manipulate images in a dry, clean digital darkroom instead of a wet, full of chemicals traditional darkroom. In this digital darkroom, I let my creativity flow.
